

Technical Manager

Introduction

Transocean Coatings is a worldwide association of independent paint manufacturers collaborating in R&D, Marketing and Sales in the field of Marine- and Protective Coatings. The organisation exist since 1959 and Transocean products are approved by Class societies, independent laboratories and major institutional clients.

Transocean central office and test lab is based in Berkel en Rodenrijs, Netherlands. The central office develops and directs R&D programs for the group as well as supports Marketing/ Sales activities of its member companies.

To strengthen the central office team, Transocean Coatings is looking for an international oriented person with an affinity to (IT) - technology. One of the main responsibility will be to further develop and maintain the Transocean in-house developed databases which are used to support R&D and Marketing/ Sales. The candidate will provide training services to our member companies in using the databases.

Additional responsibilities consist of designing and executing R&D testing programs and/or becoming involved in business development or commercial activities depending on interest and capabilities of the candidate.

Transocean offers great flexibility in career development and is open to new initiatives. The position is an unique opportunity for those seeking a combination of technology with international marketing and development. The candidate will be based in our Berkel and Rodenrijs office. A certain amount of international travel (approx. 20 %) may be part of the job.

Job Requirements

- An academic degree in for instance polymer chemistry, materials sciences or chemical engineering. Some years of working experience in developing and/or testing coatings is an advantage.
- Knowledge of working and programming databases in Python or SQL is preferred.
- Good communication and presentation skills in English (verbal and in writing) and Dutch (verbal) is required. Knowledge of other languages is an advantage.
- EU citizenship and residence in Netherlands is required.
- A service-orientated mindset and a flexible attitude.
- Ability to plan and coordinate multiple projects with varying timelines. Excellent project management skills.
- Once started, the candidate must be able to plan and execute work independently.
- Must be willing to travel internationally and flexible to adapt to other cultures.
